

## Environmental Policy

---

Management of Engenicom are committed to meeting our environmental responsibilities, and as such will educate our workers and manage all sites under our control in an environmentally sustainable and responsible manner.

To make certain that environmentally diligent behaviour is embraced as an integral part of our work practices, we specifically assume responsibility to

- ✓ Implement and maintain the Engenicom Environmental Management System to satisfy the requirements of AS/NZS ISO 14001
- ✓ Conduct all operations in compliance with relevant environmental legislation, regulations, licences and other requirements
- ✓ Prevent pollution and achieve continual improvement in environmental performance through economically viable practices on all Engenicom controlled sites
- ✓ Reduce the environmental impact of the products we make through consideration of resource inputs and production methods, while meeting consumer quality expectations
- ✓ Set specified environmental objectives and targets, and review our performance annually
- ✓ Improve energy, water and waste efficiency on all Engenicom controlled sites
- ✓ Communicate openly and constructively with our workers, suppliers, customers, government and community about our environmental practices
- ✓ Educate our workers on environmental responsibilities to ensure that a sustainable approach is integrated into work practices, training, decision making and performance assessment
